

Discover Microsoft 365 Power Platform

Drive Your Business Forward with the Microsoft 365 Power Platform Advantage.

Unlock your business potential by using Microsoft 365 Power Platform's collection of tools and services to analyze, automate, and act on data and processes within your organization.

Discover how your business can use Power Platform to overcome common challenges such as:

- ✓ Automating tedious and time-consuming manual processes.
- ✓ Organize, analyze, and measure complex Key Performance indicators (KPIs).
- ✓ Handling large volumes of common inquiries.
- ✓ Consolidating data scattered across various sources, spreadsheets, and databases.
- ✓ Leveraging an existing Power Platform to enhance processes and workflows.
- ✓ Increasing productivity and integrations without the traditional development cost.

Already have Microsoft 365 Power Platform? GDC can still evaluate if your business is utilizing all the tools to their full advantage.

Power BI. Visualize and analyze data from various sources, including Excel, databases, and cloud services, to make confident, informed decisions about your business.

Power Apps. Turn your ideas into solutions with this low-code application development platform to create custom business applications without extensive coding knowledge.

Power Automate. Boost productivity by managing, automating, and optimizing processes to ensure that they are constantly maintaining value-add from digital transformation.

Power Virtual Agents. Build chatbots to reduce costs by easily automating common inquiries and freeing human agent time to deal with more complex issues.
