

Hardware Deployment Services

GDC Provides Sales Procurement, Imaging, Asset Tagging and White Glove Delivery Services

In Today's Competitive Market, Choose an MSP with Superior Asset Management Solutions

GDC possesses the expertise to streamline every facet of your IT asset management needs. Our secure depot facility is capable of housing up to 10,000 systems. Whether it's laptops or desktops, GDC's skilled technical team utilizes our fast, dedicated internal network to install and roll out both OEM and custom hard drive images.

With the aid of advanced imaging tools, tailored scripting, and effective management techniques, our team of technical experts ensures smooth desktop transitions. From procurement to retirement, GDC oversees the comprehensive lifecycle of IT desktop assets, including staging, hardware and software setup, deployment, and disposal. asset management needs.

Hardware Deployment Services

GDC Provides Sales Procurement, Imaging, Asset Tagging and White Glove Delivery Services

The Process Flow

- 1 Purchasing:** The client can either buy the devices from GDC or another company.
- 2 Delivery:** The devices are sent to the Depot for processing and servicing.
- 3 Processing:** Items are removed from their packaging and checked for any damage that might have occurred while shipping.
- 4 Imaging:** Utilizing high-speed, dedicated internal network to set up the devices.
- 5 Tagging:** Every device is labeled with an asset tag, which is then scanned and recorded.
- 6 Recording:** The information from the service tag is captured and used to create a digital record.
- 7 Packaging:** After processing, all items are packaged again and securely placed on pallets for storage.
- 8 Delivery:** Upon request, GDC will handle the delivery of the shipments.

Our Facility Capabilities

GDC's 20,000 sq. ft. facility is perfectly positioned to meet all your end-to-end deployment needs. Our secure imaging facility has the capacity to receive and store up to 10,000 devices for large-scale deployments. Our tech experts utilize a high speed, dedicated internal imaging network to deploy custom images quickly and efficiently - with the ability to image over 1600 systems in a standard 8-hour workday.
